

## Preston A. Larimer

Principal, Greenlight BTS, LLC  
Ellettsville, Indiana

Preston Larimer is a Microsoft Business Solutions Certified Professional in Dynamics AX who has provided enhancements, integrations and training on more than 15 Dynamics AX ERP implementations. He has been the lead development resource on multiple Dynamics AX implementations and has extensive experience with SQL, EDI, systems integration, and RF management for Dynamics AX and other products. He is an expert in Dynamics AX configuration, development and integrations, the MorphX IDE, and the X++ programming language. On multiple occasions, Preston has collaborated with Microsoft to provide development, training, and course review for their Business Solutions division around the Dynamics AX product.

Prior to becoming an Dynamics AX developer and information systems consultant, Preston served as the Manager of Data and Development for a large regional CPA and consulting firm. In this role, Preston helped form the firm's strategic technology directives. He led a team of technology specialists to implement ecommerce and CRM solutions as well as enhancing the firm's information management and reporting capabilities through creative database applications. Charged with the responsibility to seek out new technology solutions that effectively addressed the firm's strategic business needs, Preston's team researched and evaluated emerging technology for consideration by firm leadership.

Preston gained much of his technology savvy from the years he spent working on the information infrastructure at Indiana University. He held the positions of Manager of Information Services for the Office of the Vice President of Research for four years during which he time he designed and implemented the first online graduate admission application in North America and was a key presenter at a National Association of Graduate Admission Professionals conference on designing and managing electronic student records. Additionally Preston was a Public Consulting Manager with the university for three years where he managed and coordinated a staff of 30 consultants providing first line support to patrons of the University's public computing facilities. At the time of his service with the University, he gained valuable experience with a multitude of technologies and business solutions. Preston also served as an Adjunct Faculty Member for Indiana University's Kelley School of Business where he taught business technology courses.

Preston and his wife, Melissa, raise three boys in Southern Indiana. He is an avid reader and, when not in front of a computer, enjoys spending time outdoors with his boys.
